

## **Distance Learning Parent Testimonials**

“I just wanted to send you a note thanking you and all the teachers at NDA for their amazing response to this unique and challenging learning situation. Since I am actually able to compare two different schools's responses to this situation, I just wanted to share with you how very impressed we all are with NDA's preparedness and approach to online learning. Even before we all embarked on this adventure, you communicated with parents and families that you had a plan, were prepared, and it shows.”

“While we did have a few technical difficulties, they were quickly and easily overcome. All the teachers have been very responsive and have truly made an effort to make online learning a positive learning environment for the students. I appreciate that they are taking the time each day to require students to log in and turn in work daily. They have thought outside the box by providing different methods for the students to learn beyond just a worksheet.”

“I know too often you probably hear all the negatives, I just really felt that you needed to hear not only how impressive you and the teachers of NDA are everyday, but in this situation you are excelling and shining. Thank you so much to you and all the teachers. We are truly blessed to have this amazing group of teachers shaping our children.”

“These are unprecedented times of change and adaptation. Thank you for the efforts and time that you and everyone at NDA are putting in to continue the kids education. It is truly appreciated.”

“My oldest had a very easy time and understood everything assigned. Felt very manageable and clear.”

“We really liked the video prayer to start the day for third grade - my whole family watched it (and cried). The video of her reading was nice and perfect to do before bed.”

“My youngest child's highlight was hearing Miss Keenan's voice!”

“Thank you very much for getting school going so quickly. We were so glad that they do not have to miss much. It is much appreciated.”
