

Thank You

to students of the Notre Dame Academy for assembling and deploying We Share Solar Suitcases to schools in Kenya.

Before receiving these Solar Suitcases, students at these schools had limited access to electricity and relied on generators and kerosene lanterns.

The Solar Suitcases were deployed to Turkana and Migori counties, Kenya.

Two Solar Suitcases, built by students of the Notre Dame Academy, were installed at schools in Muhuru Bay and [Kakuma Refugee Camp](#), Kenya. The schools had no or limited access to electricity which impacted student learning and the times the students could study at the schools. With the addition of the Solar Suitcases to light the classrooms and offices, the students will have extended times to study and prepare for state examinations. The teachers will be able to prep for lessons for an extended time and charge their mobile devices without having to travel long distances. Thank you for helping to light up education in Kenya!

Deployment Stats

- Students Served
188
- Teachers Served
46
- Classrooms Lit
5
- Power from the Solar Suitcase will also be used to charge tablets, e-readers and laptops during the day.

In this regard, we hereby appreciate the organization for extending this support to our school, we can not forget to thank the team of mainly female experts led by Ms. Jacinta Gatwiri who tirelessly conducted installation of the solar equipment and thereafter held a training session aimed at equipping the teachers and students on how to make good use of the equipment as well as maintenance practices as outlined in the user manual and guide.

The team also instructed our students on how to carry out academic 'Smart Studies' and also on how to undertake studies from Certificate, Diploma to Degree for those who would not qualify for direct entry to University within the parameters related to the roles of KUCCPS and Higher Education Loans Board.

With reference to contract to receive solar suitcase from We Share Solar, the school will be responsible for the funding and replacement of the battery in 2-3 years and also light bulbs and other accessories .

We will appreciate if you could extend similar support at your most convenient time to our Forms 1 and 2 students. It is hoped that as you light the world, educators and students will be empowered to realize the students' and institutional set goals.

Looking forward to hear from you at your most convenient time.

Thank you in advance.

Yours faithfully,

ODHIAMBO JOHN OGALLO
PRINCIPAL.
